

Come and hear about the latest WiFi trends & Webroot's Next Generation Security Solutions

XIRRUS solutions perform under the most demanding circumstances, offering consistent “wired-like” performance with superior coverage and security.

XIRRUS offers the only Wi-Fi solution that can grow and adapt to meet the constantly changing and increasing demands of today’s connected, BYOD world.

Webroot delivers next-generation security and threat intelligence services for endpoint, mobile, web, and IoT devices. Through its web-based management console and integration with RMM and PSA platforms, Webroot brings smarter protection that is easy to deploy and manage, and uniquely addresses traditional reseller and MSP challenges. Partnering with businesses of all sizes, Webroot secures your customers against sophisticated threats—no matter how or where users connect.

XIRRUS, Webroot and **Bluechip Infotech** invite you to attend our **PIZZA & Drinks** night to network with your peers
