BLUECHIP - VEEAM CLOUD CONNECT EASY & SECURE OFFSITE STORAGE OF YOUR VEEAM BACKUPS

Bluechip Veeam Cloud Connect solution enables businesses who already use the Veeam Backup and Recovery software to copy their backups to our Data Centre for offsite storage.

It provides a flexible, resilient and scalable solution that avoids the cost and hassle of operating your own equipment to store offsite copies of your data. It is the ideal solution for companies who want the additional peace of mind of offsite backups without making significant capital investment.

The solution is based on an OPEX pricing model according to the number of virtual machines you are protecting and the amount of space you require, making it easy to forecast your IT budget. The quota of storage and virtual machines can easily be adjusted allowing the cost to follow changes in your environment.

Setup of the service is extremely fast and requires very little configuration, allowing you to continue protecting your data without disruption. You restore from your local backup storage in normal circumstances for maximum restore speed. Backups are performed using backup copy jobs meaning that the transmission of data does not delay your backups.

KEY BENEFITS

SAVE TIME AND MONEY

Avoid the need to buy and maintain a backup solution to store your backups. Just pay for the resources you need.

FAST AND SIMPLE

No complex configuration – simply enter three pieces of information into your familiar Veeam software and get started with your backups.

SECURITY

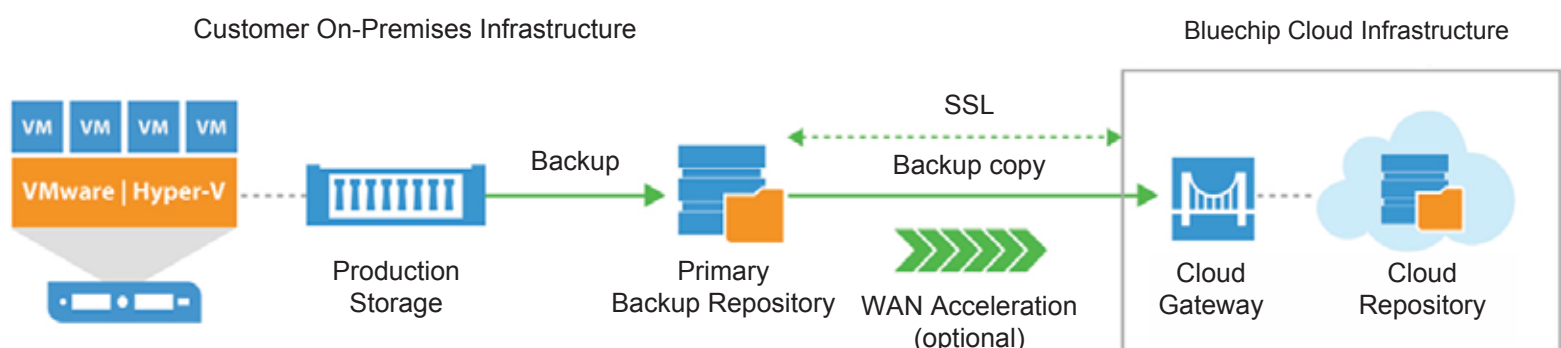

Your data is sent securely over the Internet without the need for a VPN or complex firewall rules.

PEACE OF MIND

Know that a copy of your business critical data is held in enterprise grade Data Centres.

NON-DISRUPTIVE

Add offsite backups to your existing Veeam platform without the need for major reconfiguration or disruption. Continue to benefit from all of the functionality you use in Veeam.
