Crash Cart Adapter
CV211**

AN ALL-IN-ONE CRASH CART ADAPTER

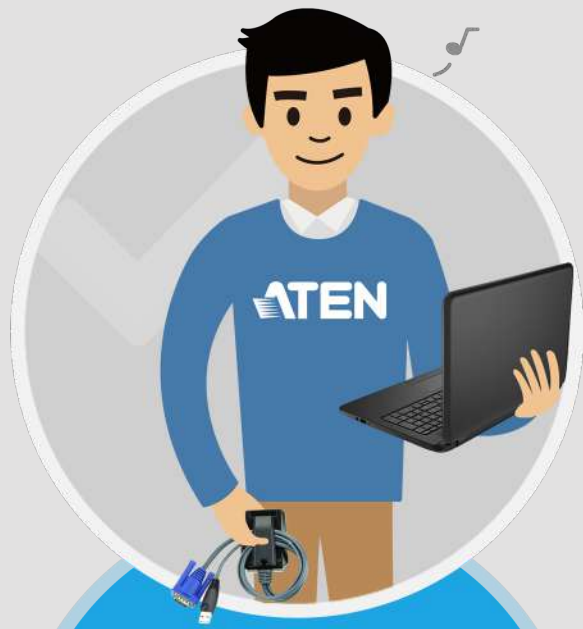

ATEN's CV211 is a USB KVM console designed specifically for frustrated mobile IT managers. It is the perfect crash cart replacement that turns your laptop into a KVM console combining the functionality of a wormhole switch, capture box, external DVD-ROM, keyboard, mouse and monitor all in one compact and convenient unit. You are free to quickly and professionally diagnose and troubleshoot servers, ATMs or PoS systems with ease.

Before

- 1 Laptop
- 2 Monitor
- 3 Keyboard/Mouse
- 4 Capture Box
- 5 Wormhole Switch
- 6 External DVD-ROM
- 7 Cables and Power Cords

After

- 1 Laptop
- 2 CV211

CONTROL INTERFACE

More functions are available on an easy-to-use toolbar located within the remote view window.

Capture | Record | Video Sync | On-Screen Keyboard | Mouse Sync Mode | Zoom | Settings

WHAT PEOPLE ARE SAYING

“Using the CV211, you can determine the status of the host within five minutes. This not only shortens working hours but also greatly increases our overall effectiveness.”

– Mr. Lin, Server Maintenance IT Engineer

“Using the CV211, one of our branch assistants can connect to the server so we can troubleshoot remotely from the Taipei office, meaning no one has to take a special trip. This saves us time, manpower and costs.”

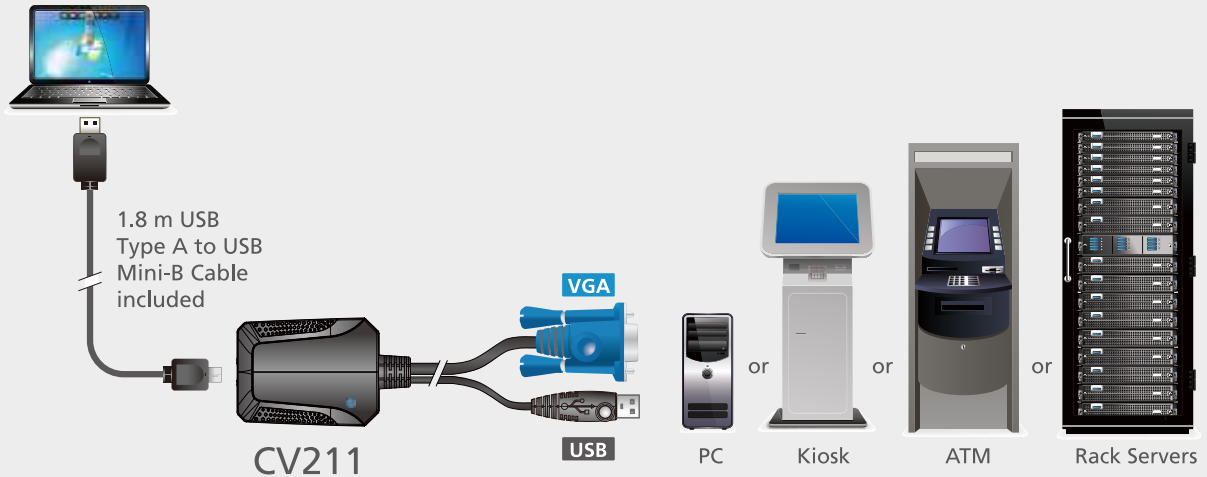

– Mr. Wang, MIS, Large Corporation

HOW IT WORKS

Local Usage

Connect CV211 directly to the target server/system from your laptop and troubleshoot with ease.

Remote Usage

Connect CV211 to the target server from your laptop to collaborate with remote colleagues, or allow troubleshooting by remote engineers via remote access software.
