

VISIOTECH 10-PORT USB DOCKING STATION

The Visiotech 10-Port USB Docking Station is Visiotech's universal charge and dock station. Users can connect 10 cameras via the units USB3.0 port to a Visiotech DEMS Docking Station PC.

There are two Docking Station models in this range. These are designed with the specific USB connectors required for the Visiotech Body Cameras, Badge Cameras, and Tactical helmet Cameras. (*USB-C or Mini-USB*)

Features:

- All-metal construction, durable and tough. Four support pads and air vented sides.
- High Speed USB 3.0
- Fully compatible with USB1 .1, USB2.0 and USB3.0.
- Overload voltage and current protection.
- Australian / New Zealand RCM compliant PSU.
- Main power switch with USB-3.0 B connector.

PICTURE:

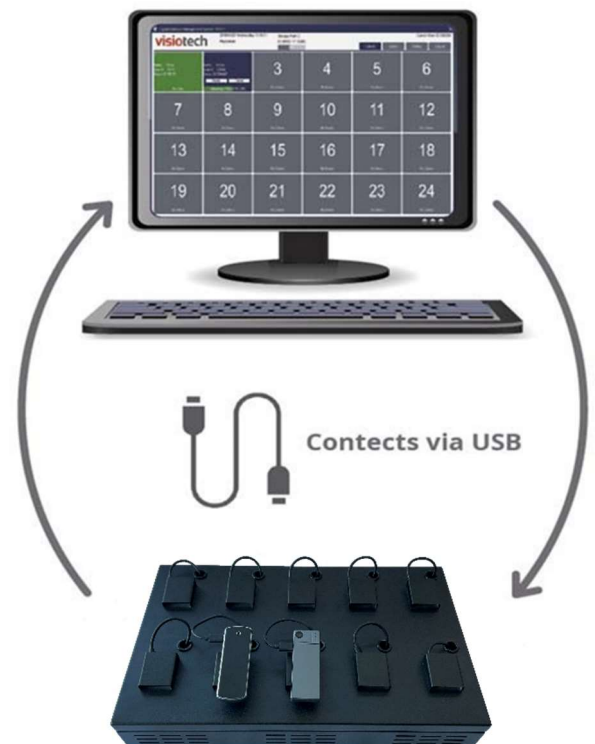

(Docking Station does not include cameras)

HOW TO USE:

1. Connect the Docking Station to the PC running the Visiotech DEMS Docking Station software.
2. Power on the Docking Station.
3. Dock/Connect the body cameras one by one. Refer to the DEMS Docking Station software manual for further detail on this process.
4. The body camera data will be uploaded to the DEMS Docking Station PC and the camera will start charging.
