

Defeat Ransomware Redefine Resilience

Ransomware Protection Plus eliminates ransomware, reduces downtime and drives operational resilience, empowering your organization to stay ahead of adversaries and safeguard your critical assets.

About us

We provide proactive, pre-emptive protection against cybercriminals and Ransomware-as-a-Service (RaaS) providers targeting organizations of all sizes. Defending against ransomware is a high-stakes battle, but Ransomware Protection Plus turns the tide in your favour. Leveraging insights from real-world ransomware campaigns and advanced machine learning, we counter the most sophisticated threats with minimal system impact.

Key features

Detect behaviour anomalies with ML

Identify ransomware by analyzing suspicious activity in real time.

Intercept ransomware mid-attack

Neutralize ransomware in its tracks, preventing encryption and minimizing damage.

Recover ransomware-encrypted files

Restore encrypted files instantly —no downtime, no ransom paid.

Protect from zero-day ransomware

Defend against never-before-seen ransomware attacks and emerging strains.

Ransomware protection starts where your existing security solutions end.

Security tools have been around for decades, yet ransomware continues to surge, exploiting gaps in conventional defenses. Ransomware Protection Plus fills these gaps by enhancing your security posture to detect sophisticated ransomware that evades traditional security tools reliant on signatures and regular definition updates. Ransomware Protection Plus acts as your last line of defense, warding off advanced ransomware while seamlessly coexisting with your existing security stack. This integrated approach reduces risk exponentially, safeguarding your organization from ransomware's crippling financial, operational, and reputational fallout.

 **~1%**

System bandwidth utilized by our anti-ransomware agent, reducing resource footprint.

 **2.5M+**

Endpoints currently under continuous 24/7 protection
