

OpenText Secure Cloud

One platform to streamline, secure, and succeed

Benefits

- Streamlined operations and scalability**
 Centralise cybersecurity tools for efficient management and easy business expansion with flexible configurations.
- Productivity and analytics**
 Automate tasks and gain real-time insights into security and customer needs.
- Customer experience and cost efficiency**
 Enhance support with proactive features while reducing costs through unified billing and task management.
- Licence subscription and security management**
 Manage licence subscriptions and product deployments, and stay ahead of threats with AI-driven security solutions.
- Unified console and product experience:**
 Easily jump between multiple solutions without needing to log in to additional products or services.

Your business faces increasing complexity in managing multiple cybersecurity tools, subscriptions, and vendors, often leading to inefficiencies and higher costs. With cyberthreats growing more sophisticated, organisations need a streamlined, scalable solution that simplifies operations and provides comprehensive protection.

Unlock the full potential of your business

The OpenText™ Secure Cloud platform delivers an all-in-one solution to streamline your cybersecurity solutions and operations. Offering a modernised user interface, enhanced analytics, tailored product recommendations, and a unified dashboard, our platform is designed to optimise your processes, enabling effortless management of tasks, customers, and orders. Simplify your operations and reduce expenses while driving business growth with API and PSA integrations, subscription management, and a host of other features—all in one place.

Discover the Secure Cloud platform and solutions

The Secure Cloud platform simplifies cybersecurity solutions and operations with a unified dashboard that helps manage tasks, customers, and orders while providing real-time analytics and KPI insights. Subscription management is streamlined, making onboarding and renewals easy with tools like a customer event calendar and order history. Consolidate security solutions in one place, and seamlessly integrate with platforms like HaloPSA, Autotask, ConnectWise Manage, and Kaseya BMS.

The platform offers 24/7 chat support and a team of channel managers and solution consultants to support your business growth. Flexible licensing options and enhanced ordering processes allow for quick product configuration, saving you time while delivering better value.

OpenText Secure Cloud

Recovery and compliance

OpenText™ Cloudally Backup

Provides comprehensive, automatic backup and recovery for popular SaaS applications such as Microsoft 365, Google and Salesforce.

OpenText™ Core Email Continuity

Provides failsafe protection for your email and ensures email access, even when your email infrastructure is down.

OpenText™ Core Business Communication Archive

Empowers your organisation to meet changing regulatory and corporate governance requirements.

OpenText™ Server Backup

Delivers reliable, cost-efficient server protection that speeds recovery, minimises downtime, and simplifies support.

Threat protection and email security

OpenText™ Core Email Encryption

Removes the hassle of encrypting email and makes it easy to meet compliance requirements.

OpenText™ Core Email Threat Protection

Provides multi-layered filtering for both inbound and outbound emails protecting against phishing, ransomware, BEC, impersonation, and more.

OpenText™ Core Security Awareness Training

Educate your employees to identify and report scams to strengthen your organisation's security posture.

OpenText™ Core Endpoint Protection

Comprehensively tackle the most advanced endpoint attacks, whether from internal or external threats.

OpenText™ Core DNS Protection

Keeps web-based threats, malware downloads, and online content from wreaking havoc on your users.

Threat hunting and remediation

OpenText™ Core EDR

Quickly identify and mitigate attacks that evade initial defences with continuous endpoint monitoring that detects, investigates, and responds to sophisticated threats.

OpenText™ Core MDR

Delivers 24/7 managed cybersecurity service that detects and responds to advanced threats across endpoints, networks, and cloud. It combines expert analysis with rapid incident response to reduce the burden on internal teams.

One platform to streamline, secure, and succeed

With a unified approach to cybersecurity management, this platform empowers businesses to operate more efficiently, reduce costs, and stay ahead of emerging threats. By streamlining operations, enhancing visibility, and offering flexible security solutions, it provides the tools you need to scale your business and protect critical assets. Simplify your cybersecurity strategy with a comprehensive platform designed to drive growth, improve productivity, and secure your future in a constantly evolving digital world.
