BLUECHIP IT PARTNER OFFER

APOLLO BY SPACERA · NOW THROUGH BLUECHIP IT

# You installed the room. Now get paid to keep it ready.

Apollo tests every meeting room before the working day starts, watches it all day and, where the manufacturer's cloud supports it, lets your desk **fix it in one click from anywhere.** Turn the rooms you already install into a monthly managed service.

30-minute live demo | 30-day free trial | Photon free, no expiry

**1 in 7** **meeting rooms fails its morning launch check.*** Apollo finds the fault before the first person walks in, not after the meeting has started.

HOW APOLLO WORKS

## From waiting for a ticket to knowing first.

1 **Test**
A real test call into every Teams, Zoom and Webex room before work starts.

2 **Detect**
Every room, platform and device brand watched all day, in one view.

3 **Diagnose**
Emily, the automated L1/L2 technician, triages each alert and names the fix.

4 **Fix**
Apollo Actions restarts the app or device in one click. Never mid-meeting.

5 **Prove**
Apollo re-tests the room and records the fix on the ticket.

FOR BLUECHIP IT PARTNERS

## A service to sell long after the install is done.

### Start every conversation free
Photon shows a customer every room and device live, free and with no expiry. Lead with how many rooms are failing.

**Visibility is free. Reliability is the product.**

### Sell it the way you work
Resell Apollo with Spacera's service desk behind it, or run your own managed service on it, under your own brand.

**Recurring revenue from rooms you already install.**

### Stop sending technicians to push Reset
Most faults are fixed by restarting something. Do it from the desk, where the manufacturer's cloud supports it.

**Minutes to fix, not a site visit.**

GET STARTED

## See it live on real rooms. Then try it free.

1 **Book a 30-minute live demo**
Launch checks, Emily triaging an alert, Apollo Actions fixing a room, and the partner console.

2 **Trial Mission Control free for 30 days**
On your own meeting rooms, after the demo.

3 **Photon stays free**
For every customer, with no expiry.

**Scan to book a demo**
info.spacera.io/bluechip

**Works with** Microsoft Teams · Zoom · Cisco Webex · Google Meet · Neat · Poly · Logitech · Yealink · Crestron · ServiceNow · Jira
**Trusted** ISO 27001:2022 certified · Cloud to cloud: nothing installed in the room, no inbound connections · Neat Platinum Technology Partner · Microsoft ISV Partner

*Apollo data, 90 days to 1 October 2026: 15.5% of 41,713 completed Zoom and Webex launch checks found a fault. The launch-check board is an illustrative example. Apollo Actions works where the manufacturer's cloud supports it: a person presses the button, and Apollo checks the room isn't in a meeting first and confirms the result. © 2026 Spacera Pty Ltd · spacera.io
