

BEYOND LIMITS

Pushing Boundaries of DECT Wireless and Bluetooth Headsets, 1 = ∞

The first UC-certified dual-mode (Bluetooth & DECT) headset WH64, retains the advantages of DECT while overcoming mobility limitations with the headset built-in Bluetooth. 1 does really equal ∞.

1 = ∞ Headsets

The biggest bang for your buck

Combine the range advantage of a DECT wireless headset and the flexibility of a Bluetooth headset, you can "own" more than one headset with a single purchase.

1 = ∞ Platforms

Future proofing

Born to manage uncertainties in the changing working environment, WH64 supports connections with traditional desk phones, softphones and your mobile devices.

1 = ∞ Scenarios

All headset using scenarios

No longer be confined to your desk in the office, WH64 can bring you greater flexibility from the first meeting of the day in the office to the last call at home.
