

Human Risk *Intelligence* built for IT Teams

See risk. Act. Show progress.

Human Risk Intelligence connects scattered awareness, identity, and security signals so teams can see where risk is concentrated, prioritize action, and track progress over time.

-  Risk Visibility
-  Focused Action
-  Compliance Readiness
-  Measurable Improvement

FROM SIGNALS TO ACTION

See where risk sits. Know what to do next.

See where risk is concentrated

Identify the users, identities, and weaknesses that need attention first.

Focus on what matters most

Surface where weaknesses combine and which risks need attention first.

Turn insight into action

Guide training, phishing, credential, MFA, policy, and access actions from clearer risk insight.

Show progress over time

Track changes in risk, compliance activity, and program progress across your organization.

FIVE PRODUCTS, ONE PLATFORM

Five connected products. One clearer risk picture.

uHealth NEW

Connect risk signals to show where risk is concentrated and what to prioritize first.

uLearn

Deliver adaptive awareness training based on user risk and knowledge gaps.

uPhish

Run realistic phishing simulations that reveal and strengthen threat response.

uPolicy

Distribute, track, and evidence policy acknowledgments.

uBreach

Monitor exposed credentials and surface account-level exposure.

BUILT FOR YOUR TEAM

Reduce human risk without adding more admin

Risk visibility

See risk across users, identities, and your organization.

Automation

Automate campaigns, reminders, policies, reporting, and follow-up.

Reporting

Show risk, action, and progress across users and teams.

Multi-tenant management

Manage your human risk program from one platform.

WHY HUMAN RISK INTELLIGENCE

Turn scattered signals into stronger security decisions

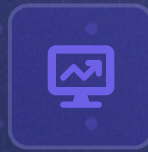

One connected risk picture

Clearer priorities

Focused remediation

Evidence progress

Connect disconnected risk data, prioritize what matters, and turn insight into focused action across your organization.

TRUSTED WORLDWIDE

Built for security teams. Proven at scale.

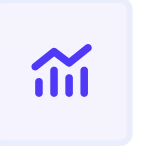

Trusted by 16,000+ organizations worldwide

Easy to manage

Automate training, phishing, policies, reporting, and follow-up.

Proven in practice

Used by organizations worldwide to reduce human cyber risk.

Compliance-ready

Support audit and governance conversations with clearer evidence.

Built to scale

Manage human risk consistently as your organization grows.
