

Yeostar and Bluechip Announce A Distribution Partnership In Australia

XIAMEN, CHINA / SYDNEY, AUSTRALIA – Feb 12th, 2019 – Yeostar (www.yeostar.com), the world's leading provider of SME PBX system, and Bluechip Infotech ([www.](http://www.bluechipinfotech.com)), a specialist provider focused on delivering the latest IT products to a wide channel base, today jointly announced a new distribution partnership in Australia. Yeostar welcomes this new partnership with Bluechip Infotech to provide the full line of innovative VoIP products and Unified Communications solutions to resellers and businesses throughout Australia.

*“We are thrilled to bring Bluechip Infotech on as a distribution partner and will work with Bluechip Infotech to meet SMEs needs with flexible, reliable and powerful communication solutions consistently.” said **Alan Shen, CEO of Yeostar**. “Through this new partnership, we strongly believe that Bluechip Infotech will help us expand our presence in Australia and we pledge our continued commitment to enabling success for our partners and their customers.”*

“Yeostar’s addition to the Bluechip Infotech portfolio will strengthen our overall offering in the Unified Communications and reinforce our position and ability to service the Australian SMB and mid-market business sector,” Bluechip managing director Johnson Hsiung said.

“We are also excited about the market opportunity which Yeostar will provide to both our direct and in-direct partner who are always looking for innovative, new and easy to deploy IP PBX solutions to meet changing customer demands.”

As a distributor of Yeostar solutions, Bluechip Infotech will distribute the complete range of Yeostar innovative and high-performance VoIP products including:

S-Series VoIP PBX: Easy to manage, configure, and install, the feature-rich S-Series unleashes the power of unified communications and meets the growing needs of SMEs.

Yeostar Cloud PBX: A robust, flexible and easy-to-use hosted business phone system.

VoIP Gateways: A complete portfolio of VoIP Gateways that covers the business need of connecting FXS, FXO, GSM/3G/4G, ISDN PRI to VoIP.
