

Cloud-based All-in-One IT Monitoring Platform for MSPs and CSPs

“Site24x7 is our preferred monitoring tool. The solution is quick to deploy, easy to manage, provides all the key insights we required, and has a responsive support team. Recently we worked with our parent company Telstra on completing an audit for AWS Managed Service Provider program, Site24x7 was key to us passing this audit. I would highly recommend Site24x7 to other IT teams or solution providers.”

David Harbert - National service delivery manager, Kloud

Gain the edge over your competition with Site24x7's MSP platform

Multi-tenancy

Securely manage the accounts of multiple customers. Gain total visibility into client systems and scale to accommodate any number of customers.

White Labeling

Rebrand your monitoring platform and reports with a custom name, logo, and URL so that you can promote your brand, and customers can identify with it.

Flexible Dashboards and SLAs

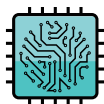

Proactively share reports, customized dashboards, NOC views, and business views highlighting all metrics slowing down your website, with your clients. Send SLA reports to update customers about your service consistency.

Granular Roles and Permissions

Utilize individual operational roles to monitor and manage customer accounts. Unified licensing offers account admins full control on subscription and billing activities across customer accounts, including control over upgrades, add-on purchases, and alert credits.
