

Be DisasterReady

with ActiveImage Protector for Windows and Linux RPO: 5 minutes | RTO: 5 minutes

ActiveImage covers all your backup and disaster recovery needs with a single solution. Windows or Linux, Physical or Virtual, Agent or Agentless you won't find a faster, more reliable way to recover systems and data.

What makes us different?

ActiveImage is a pioneer of agentless backup of virtual machines and data deduplication.

Our innovative approach to protecting virtual environments doesn't require any agent software to be installed on a host or virtual machine, and additionally supports mixed agent based and agentless backup.

ActiveImage's Inline Data Deduplication Compression deduplicates data by blocks during the backup process (and not afterwards) with little to no impact on backup and restore times.

Our focus on 'Instant Recovery' has led us to develop multiple features to deliver business continuity to meet most any SLA and budget.

A Single Solution for ALL your Business Continuity Needs.

- Unlimited Replication to Public Cloud or Private Cloud
- Daily Automated Recovery Testing
- Instant Availability with Flexible Recovery Options
- "NEW" Built in Anti-Malware options
- Centralised management and monitoring incl. deployment, backup management, patch management, remote access, remote monitoring
