

**Extreme Speed.**  
High Bandwidth.  
Data Centre Optimised.

## D-Link 5000 Series Data Centre Switches

The D-Link 5000 Series Data Centre Switches are a series of high-performance switches that feature **high port density, routing, and ultra-low latency, designed to be deployed as Top-of-Rack (ToR) or leaf-spine switches** in data centre applications. Combined with **ONIE support** and increased cost-efficiency, the 5000 Series form a flexible long-term solution for managing and expanding a Data Centre infrastructure within a Software-Defined Networking (SDN) environment.

### Bare Metal & Open Networking

- ✓ Pre-loaded with Open Network Install Environment (ONIE)
- ✓ Redundancy features, including hot-swappable power supplies, and redundant fan trays
- ✓ Variety of high-speed interface combinations to meet different network requirements
